

# URBAN QUEST

January 2009

## RED ZONE ADVENTURES

Timonium, MD

The Theme Factory was brought in to design and produce two Urban Quest themed attractions for the Red Zone Adventures entertainment center, which consisted of a 9-hole miniature golf course and a two-level laser tag arena.

To completely immerse guests in the environments the Theme Team created 3D props of machinery including industrial-sized exhaust fans, large ventilation units, and iron-like crane claws hanging from the ceiling. Twisted I-beams surrounded by rubble and hazardous waste barrels completed the theming throughout. Our artists painted expansive murals on the perimeter walls including scenes of endless warehouse shelving, stacks of crates, and oversized ventilation ducts.

Interior illuminated props were also created as the target bases inside the laser tag arena and a 9<sup>th</sup>-hole prop with a challenge hole and special effect sounds and lighting. These props feature milled cabinetry with rounded cutouts, routed acrylic shapes, and colorful lighting effects from within.
